

# Hammocks and Bivvy bags

The 10 Hammocks and 10 bivvy bags are in the shed between Pine and Cedar which looks like this..

The items are stored like this with the Bivvy bags and tarps on the top shelf, the Hammocks on the middle shelf and the hammock rain tarps on the bottom shelf:

# Hammocks

The hammocks are all in their own bag, please leave the clips on the hammocks not the trees.

The trees have black eyelet loops with a number tag on each end showing where the hammocks are to be used. Simply open the bag and attach the clips to the eyelets at each tree some have small amount of chain to bridge any gaps.

There is an inbuilt fly screen that needs to be unzipped before getting into the hammock.

**NO SHOES** to be worn in the hammock.

How they are stored and how they need to be returned to the shed after use

# Hammocks

There is a rain fly sheet available if there is rain forecast.

In the event you need this they are next to the hammocks in the shed, The top line is already installed above each hammock and the fly sheet can be placed over each hammock should they be needed, there are 6 guy ropes on each and these can be pegged out.

How they are stored and how they need to be returned to the shed after use
